INDEX

(Prepared by Dr. Robert L. Volle)

Abraham, E. P. The cephalosporins, 473
Acetylcholine, 281
  poikilothermic invertebrates, 291, 304
  poikilothermic vertebrates, 282, 302
  reticular formation, 188
Adrenalcortical steroids, 317
  biological actions, 329
  biological assay, 354
  chemistry, 320
  glucocorticoids, 336
  metabolism, 361
  modes of action, 356
  regulation of secretion, 321
  sex hormones, 343
  sodium-retaining hormones, 331
  structure-activity relationships, 377
Adrenocortical insufficiency, 322
Adrenocorticotrophic hormone, 320
Amidine derivatives, 37
  antimicrobial actions, 73
  chemical characteristics, 39
  pharmacological actions, 42
  structure-activity relationships, 54
  trypanocidal activity, 73
7-Aminocephalosporanic acid, 485
Aminopterin derivatives, 94
Amphetamine, 1, 202
  learning, 17
  mood, 23
  motor control, 6
  physical endurance, 2
Androgens, 345
Antibacterial action of drugs, 73, 104
  amidine derivatives, 73
  cephalosporin C, 491
  cephalosporin P, 477
  folic acid antagonists, 104
Anticonvulsants, 208
Antihistamines, 271
Antiparkinsonian agents, 209
Benzoquinolizines, 538
Bush, I. E. Chemical and biological factors in the activity of adrenocortical steroids, 317
Caffeine, 1, 203
  learning, 17
  mood, 21
  physical performance, 2
Cancer chemotherapy, 91
  folic acid antagonists, 91
  leukemias, 117
  solid tumors, 123
  steroids, 122
Capillaries, 511
Cardiovascular system, 531
  adrenal insufficiency, 327
  catecholamines, 531
  guanidine, 47
  4-methyl-2-amino-pyridine, 45
  S-methyl-thiouronium, 42
  nicotine, 159
  passage of drugs, 511
  phenyl-diguanide, 53
  poikilothermic invertebrates, 291
  poikilothermic vertebrates, 282
  serotonin, 531
  tris(hydroxymethyl)aminomethane, 465
  vascular permeability, 251
Catecholamines, 531
  poikilothermic invertebrates, 298, 304
  poikilothermic vertebrates, 282, 302
  release by drugs, 531
  reticular formation, 188
  uptake by tissues, 546
Cellular membranes, 501
Central nervous system, 1, 142, 175, 512
  convulsants, 204
  guanidine, 50
  4-methyl-2-amino-pyridine, 45
  nicotine, 142
  passage of drugs, 512
  reticular formation, 175
  stimulants, 1, 202
Cephalosporin C, 479
  antibacterial properties, 491
  biosynthesis, 487
  chemical structure, 482
  mode of action, 492
  pharmacological properties, 494
  production and purification, 479
Cephalosporin N, 479
  antibacterial properties, 490
  biosynthesis, 486
  chemical structure, 480
  mode of action, 492
  pharmacological properties, 492
  production and purification, 479
Cephalosporin P, 475

antibacterial properties, 477
biosynthetic relationships, 476
chemical structure, 475
Cephalosporins, 473
Chemical mediators, 531
acetylcholine, 188
catecholamines, 188, 531
5-hydroxytryptamine, 270, 531
permeability changes, 270
poikilothermic animals, 282
reticular formation, 188
Chlorpromazine, 542
Dalgaard-Mikkelsen, Sv. and Poulsen, E. Toxicology of herbicides, 225
Decamethylene-diguanidine, 51
Decarboxylase inhibitors, 539
Delmonte, L. and Jukes, T. H. Folic acid antagonists in cancer chemotherapy, 91
Donnan equilibrium, 504
Drug transfer, 501
active transport, 506
diffusion, 504
filtration, 506
pinocytosis, 507
techniques for study of, 508
Enzymes, 531
cholinesterases, 305
decarboxylase, 539
diamine oxidase, 75
monoamine oxidase, 74, 541
penicillinase, 488
proteases, 259
Erythrocytes, 522
Estrogens, 343
Fänge, R. Pharmacology of poikilothermic vertebrates and invertebrates, 281
Fasiter, F. N. Structure-activity relationships of amidine derivatives, 37
Folic acid antagonists, 91
biological actions, 104
clinical application, 109
metabolism of, 110
mode of action, 95
resistance to, 125
toxicity of, 113
Gamma-aminobutyric acid, 303, 304
Gestagens, 344
Glucocorticoids, 336
Guanethidine, 543
Guanidine, 46
Haag, H. B., *see* Silvette, H., 137
Hallucinogenic drugs, 206
Herbicides, 225
inorganic, 226
organic, 227
Histamine, 255
Hoff, E. C., *see* Silvette, H., 137
5-Hydroxytryptamine, 255, 531
permeability factor, 255
poikilothermic invertebrates, 293, 304
poikilothermic vertebrates, 282, 302
release, 531
Hypoglycaemia, drug-induced, 72
Inflammation reaction, 251
Judgment and mood; effect of drugs on, 21
Jukes, T. H., *see* Delmonte, L., 91
Kidney, 523
renal transport, 523
tris(hydroxymethyl)aminomethane, 454

Larson, P. S., *see* Silvette, H., 137
Laties, V. G., *see* Weiss, B., 1
Learning, effects of drugs on, 17
amphetamine, 17
caffeine, 17
nicotine, 141
Methotrexate, 94
4-Methyl-2-amino-pyridine, 45
α-Methyl-dihydroxyphenylalanine, 539
S-Methyl-thiouronium, 42
Monoamine oxidase inhibitors, 541
Motor coordination, effects of drugs on, 6
Mucosal membranes, 518
Muscle, effects of amidines on, 59
Nahas, G. G. The pharmacology of tris(hydroxymethyl)aminomethane (THAM), 447
Nerve-muscle preparations, 44
amidines, 59
guanidine, 48
S-methyl-thiouronium, 44
muscle relaxants, 175
poikilothermic vertebrates, 286
Nicotine actions of, 137
cerebellar functions, 161
cerebral functions, 142
conditioned reflexes, 140
convulsions, 150
medullary functions, 154
poikilothermic invertebrates, 292
spinal functions, 161
tremor, 148
Opioids, 207
Penicillin N, 479
Penicillinase, 488
inducers, 488
inhibitors, 488
substrates, 488
Permeability changes, 265

bacterial infections, 265
mild injury, 265
thermal injury, 267
time course of, 268
ultrasonic injury, 268
ultraviolet injury, 268
Permeability factors, 255
histamine, 255
5-hydroxytryptamine, 255
identification, 263, 270
polypeptides, 257
proteases, 259
Phenyl-diguanide, 53
Physical endurance, effects of drugs on, 2
athletics, 5
laboratory studies, 2
military studies, 3
Pinocytosis, 507
Polypeptides, 257
bradykinin, 258
leukotaxine, 257
Poulsen, E., *see* Dalgaard-Mikkelsen, 225
Proteases, 259
globulin permeability factor, 261
inhibitors, 272
kallikrein, 260
plasmin, 259
Reserpine, 532
Reticular formation, brainstem, 175
anatomy, 175
anesthetic agents, 191
anticonvulsants, 208
antiparkinsonian agents, 209
chemical mediators, 188
muscle relaxants, 201

1962

BALTIMORE, MARYLAND

CONTENTS

No. 1, March 1962

Enhancement of human performance by caffeine and the amphetamines. BERNARD WEISS AND VICTOR G. LATIES 1
Structure-activity relationships of amidine derivatives. F. N. FASTIER 37
Folic acid antagonists in cancer chemotherapy. LILIAN DELMONTE AND THOMAS H. JUKES 91
The actions of nicotine on central nervous system functions. H. SILVETTE, E. C. HOFF, P. S. LARSON AND H. B. HAAG 137

No. 2, June 1962

Drug action on the brain-stem reticular formation. EVA KING KILLAM 175
Toxicology of herbicides. SV. DALGAARD-MIKKELSEN AND EMIL POULSEN 225
The mediation of increased vascular permeability in inflammation. D. L. WILHELM 251
Pharmacology of poikilothermic vertebrates and invertebrates. R. FÄNGE 281

No. 3, September 1962

Chemical and biological factors in the activity of adrenocortical steroids. I. E. BUSH 317
The pharmacology of tris(hydroxymethyl)aminomethane (THAM). GABRIEL G. NAHAS 447

No. 4, December 1962

The cephalosporins. E. P. ABRAHAM 473
Passage of drugs across body membranes. LEWIS S. SCHANKER 501
Release of serotonin and catecholamines by drugs. PARKHURST A. SHORE 531
